

Delivering your business to the world

Imagine a direct connection to your customers that answers questions, gives detailed product descriptions and can even take orders. This direct connection is your website. Today's consumers have come to depend on easy access to information. ipHouse provides everything you need to host your website—whether you are looking to host your first website or you have an established web presence and need to migrate to a more robust and stable platform.

Our Web Hosting platform is designed and managed for fail-safe reliability. Its scalability will allow your website to evolve as your business needs grow. By hosting with ipHouse you can seamlessly upgrade your website as soon as you need it.

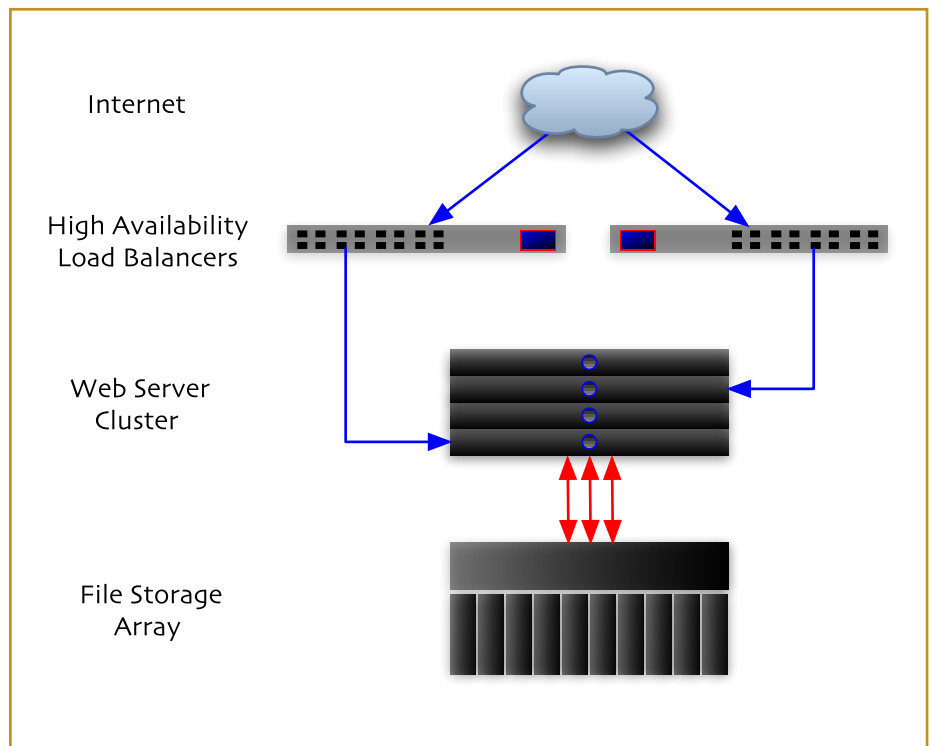

We have the knowledge and Technology

Web Hosting is taken very seriously at ipHouse. Our clustered Unix hosting platform is built on enterprise grade Dell® servers positioned behind high availability F5 Networks® load balancers. Data is stored on a fault tolerant Network Appliance® storage array. Rock solid hardware coupled with industry standard software from FreeBSD, Apache, and MySQL delivers your content flawlessly.

Our Windows hosting platform utilizes Dell® hardware, local RAID storage coupled with our near-store backup system to provide data redundancy.

Systems Expertise:

- OS (FreeBSD, Windows)
- Scripting (Perl, PHP)
- Server Apps (Apache, IIS, .NET & ASP)
- Database (MS-SQL, MySQL)
- Data Backup
- Statistics
